## **DETAILED ACTION**

### ***Claim Objections***

1. Claim 9 is objected to because of the following informalities: step b recites "via a an information", the word "a" seems to be extra. Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-8 and 17-19 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "a unique identification information in the form of an identification code of the user station equipment which identifies the particular user station equipment" and later recites, "the equipment identification code of the particular ordering user station to run only on the particular ordering user station". Claim 4 recites the limitation, "the time and date of downloading the dedicated executable application is the unique identification information." There are two distinct and contradicting definitions for the term "unique identification information" rendering both definitions indefinite and unclear. Since the parent claim must be read broad enough to encompass the dependant claim, and the dependant claim is mutually inconsistent with the parent claim, both are indefinite.

### ***Claim Rejections - 35 USC § 102***

Art Unit: 2134

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1-16, as best understood, are rejected under 35 U.S.C. 102(a) as being anticipated by Brandenburg, USPN 5,894,516.

With regard to claims 1, 5, and 13, Brandenburg discloses a method of downloading copy protected software (column 2 lines 44-51) including sending an order from a user station to an application source including a unique ID of the user station (column 2 lines 55-60) upon identification of the user station by the source, preparing a dedicated executable that can only run on the user station (column 2 lines 58-65), and downloading the dedicated application to the user station that it can run on, and can not run on another computer (column 2 lines 60-64).

With regard to claims 2 and 14, Brandenburg discloses using a library to store IDs and authenticate the request (column 2 line 66-column 3 line 16).

With regard to claim 3 and 4, Brandenburg discloses saving the executable, and informing the user of a time when to download it (column 4 lines 5-14).

With regard to claim 6, Brandenburg discloses the identification is for an order (column 5 lines 49-55).

With regard to claim 7, Brandenburg discloses a wireless network (column 1 line 67-column 2 line 1).

With regard to claims 8 and 15, Brandenburg discloses that the unique ID of the user station is needed each time the installation file is run (column 2 lines 58-65).

With regard to claims 9-12 and 16, Brandenburg discloses using the unique ID to encrypt the application that already exists (column 2 line 66-column 3 line 4).

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 17-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brandenburg.

With regard to claims 17-19, Brandenburg discloses the method of claim 1, as disclosed above, but does not mention using an already available unique machine ID to identify the purchaser. The examiner takes official notice that IMEI, ESN, and SIM are well known unique IDs already existing in computers. It would have been obvious for one of ordinary skill in the art to use an already present unique computer ID number rather than have the software generate one, for improved security and less processing.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
